FOR THE FISCAL YEAR 2018

MARSHALL  
MEDICAL CENTER

CELEBRATING

60

1959-2019 YEARS

**GABRIELLE MARCHINI**  
Board of Directors  
Chair

**JAMES WHIPPLE**  
Administrator & CEO

This year, Marshall Medical Center marks its 60th anniversary. We're celebrating by honoring our past and recognizing the inspiring efforts of the many individuals who worked hard to bring modern healthcare to El Dorado County in the late 1950s. It was no small effort: from grade school children to local businesses, civic clubs and church groups, citizens raised nearly half a million dollars in just four short months to help fund Marshall Hospital. Then, as it is now, quality health care was regarded as an important community asset.

The hospital opened in the summer of 1959, with 49 beds and 12 physicians on staff. In the past 60 years, we've grown to 125 beds and nearly 200 physicians and allied healthcare providers. With 1,800 employees, Marshall Medical Center is the second-largest employer in the county. Today, Marshall stands as one of the last independent hospitals in the state, staying true to our mission to remain a community hospital, governed by a local board of directors. No doubt, there have been some challenges in the past 60 years. But we can look back with pride at how we overcame and are better for all of those growing pains.

This annual report is a summary that highlights some of our fiscal year 2018 milestones, including financial and donor information for our nonprofit hospital. 2018 was a banner year for Marshall; last year we received a number of distinctions for excellent care and service, including:

- **Earning a 5-star rating from the Centers for Medicare and Medicaid Services (CMS) for Overall Hospital Quality.** Marshall was the only hospital in the region to receive five stars. With this, CMS recognized Marshall Hospital among the **top 7% of hospitals in California for Overall Hospital Quality.**
- Healthgrades, an online consumer ratings group, recognized Marshall with the **2018 Outstanding Patient Experience Award.** Compared to all hospitals in the nation on the same patient satisfaction measures, Marshall ranked among the **top 10% of hospitals in the country for patient experience.**
- Marshall Medical Center was on the exclusive list of companies named **Best Place to Work in El Dorado, Placer, Sacramento and Yolo counties by the Sacramento Business Journal.** Our employees were surveyed by an independent research company to measure employee engagement in categories such as teamwork, trust, compensation and benefits.

Looking back, not just on 2018 but on the past 60 years, we can say we are as proud of our history as we are of our recent accomplishments. We write our history day by day, patient by patient, leaving a legacy of caring along the way.

**JAMES WHIPPLE**

James Whipple is the CEO and Administrator of Marshall Medical Center, a role he has held since 2002. Prior to this, James was Marshall's Chief Financial Officer for 20 years, joining the organization in 1982. James also serves on the Board of Directors of the California Hospital Association.

## MARSHALL CARES about substance dependency

In an effort to combat the opioid epidemic in El Dorado County, Marshall Medical Center opened Marshall Clinically Assisted Recovery & Education Services (CARES) to support treatment for patients with substance dependency, including alcohol, tobacco, stimulants, opioids and other sedative hypnotics.

Clinic services include comprehensive medication assisted treatment with a physician, counseling, case management and behavioral health. Opening Marshall CARES will provide all of these services under the same roof, providing patients with a path that effectively manages this disease process.

One of Marshall CARES' objectives is to treat and manage patients in an outpatient setting as opposed to the ER. Since 2016, Marshall's ER has participated in an effort to move people off opioid dependency through a medication assisted treatment program (MAT). When a patient

presents in Marshall's Emergency Department in withdrawal, the patient is offered participation in MAT, which includes a prescription of Suboxone to alleviate withdrawal symptoms. The patient is then given a next day appointment at Marshall CARES to begin outpatient treatment.

## Upgrades to ELECTRONIC MEDICAL RECORDS

In November of 2017, Marshall implemented the Epic electronic health record system, allowing us to seamlessly manage and share medical records within Marshall and with other health systems. In 2018, we invested in a double upgrade, which increased efficiency for your health care teams. These changes allow an even better standard of care for you.

## A new approach to CARE IN THE ICU

The Intensive Care Unit (ICU) is the area of the hospital where the most serious patients receive care. It's specially built, with more equipment and staff than other areas of the hospital. Traditionally, hospitals rely on consulting physicians to round on ICU patients. At Marshall Medical Center, ICU patients benefit from a new model where the patients receive 24/7 specialized care delivered by four intensivist physicians. These doctors have additional training in critical care and are able to place breathing tubes, start central and arterial lines, place dialysis catheters and perform other procedures.

Under this model, patients won't have to wait for specialists from other areas of the hospital to become available and travel to the ICU, allowing us to operate

leaner and more efficiently. This full-time intensivist coverage improves patient care and outcomes for ICU patients.

## IMPROVING CARE, Reducing Waste

When you think of waste, you probably think about physical items thrown in the trash. But waste comes in other forms—it can also be defined as obstacles that get in the way of efficiency. These wastes include: time, motion, correcting defects, extra processing, overproduction, inventory and transportation. With this in mind, Marshall Medical Center focused on using lean management processes to reduce or eliminate waste in everyday tasks. The teams have been hard at work implementing these and we're pleased to see the progress we've made.

For example Marshall's Materials Management Department came up with an idea to reduce hospital supply deliveries from twice a day to just once a day. This new system will save Marshall an estimated \$18,000 per year when factoring in truck maintenance, gas and the reduction of premium staff hours.

# MARSHALL FOUNDATION BOARD OF TRUSTEES 2019

**PRESIDENT  
DARYL  
WARDEN** was born in Placerville and raised in Diamond Springs. He and his wife, Lori, have two daughters and

two grandsons. Daryl started his career in the automotive and truck repair industry and completed his career with El Dorado Disposal Service in 1998. Daryl started his own business as a private contractor repairing and fabricating trucks and equipment for the garbage and logging industries. An avid four wheeler, he makes many trips on the Rubicon each summer and joins his family volunteering for the Rubicon Trail Foundation. He also supports the Placerville Kiwanis and Images of Hope. Daryl joined the Marshall Foundation board in 2012 and now serves on all six of the Foundation's committees.

Kurt has been a member of the Board of Trustees of Marshall Foundation since 2016 and serves on the Annual Funding Committee, Finance and Investments Committee, and the Committee on Trustees.

## Funding Programs That Care for People

The Marshall Foundation for Community Health transitioned to new leadership in May 2018. Jamie Johnson succeeded Karen Good as Executive Director. Karen served the Foundation for over 20 years and her dedication and leadership created a smooth change in the position. The Foundation's solid financial status and strong board of trustees' leadership and membership set a groundwork that will continue success. This opportunity provides the Foundation to meet the Western Slope's current health care, and more importantly, the future and proactive health needs of our community.

The five months within this fiscal year gave the executive director time to meet hospital and community members to understand where the Foundation has been and where we will take a more active role in our support of MMC and the community.

This transition year presented an opportunity for an evaluation of future needs and considerations:

- Improve Raisers Edge database content to provide efficient and effective fundraising information
- Incorporating a new fundraising effort including an annual giving program
- Annual giving programs that lead to major gifts and planned gifts
- Aligning with hospital strategic plan to meet financial resource needs
- Developing a Foundation five-year strategic plan
- Develop business opportunities that align with the Foundation mission to provide:

Financial stability and sustainability

Increased donor prospect base

Engagement of other non-profits, businesses and organizations to proactively provide improved healthcare

Community capital opportunities

Work with county government to manage non-taxed revenue base programs such as Adult Day Care services.

- Refresh the Foundation brand, developing an increased awareness of the Foundation and its impact on our community
- Address mental and behavioral health issues
- Address affordable housing issues
- Engage more employees in giving

Visit [marshallmedical.org/reviews](http://marshallmedical.org/reviews) to watch a video about Nat Sherrill, who was visiting Placerville from Central California when he passed out and was rushed to Marshall Hospital, where they treated him and saved his life. Nat has graciously gifted Marshall half of his family estate.

## ABOUT MARSHALL MEDICAL CENTER

Marshall Medical Center is an independent, nonprofit community healthcare provider located in the heart of the Sierra Foothills between Sacramento and South Lake Tahoe. Marshall Medical Center includes Marshall Hospital, a fully accredited acute care facility with 125 beds located in Placerville; several outpatient facilities in Cameron Park, El Dorado Hills, Placerville and Georgetown; and many community health and education programs. Marshall has over 190 board-certified physicians and a team of over 1,800 employees providing quality healthcare services to over 180,000 residents of El Dorado County.

## OUR MISSION

Our mission is to improve the health of our community and offer health services of superior value and quality, centered on the goals and needs of our patients. We strive to deliver service that exceeds our patients' expectations.

## OUR VISION

Transforming Healthcare for you through compassion, quality and innovation.
